

Kings

An origin story

by: Joas van de Loo

Characters:

*Fire:

Fire is not his real name, his real name is still unknown. He is the king of fire. He was trained by Death. He is friends with Lia and Jacki. Because of his training he is one of the best fighters in the Multiverse.

*Death:

As Fire's master he is just a bit of a more dangerous person than Fire. His name is also unknown but many wonder if he has a name or if he is just Death and only Death.

*Lia:

This is her real name, she is queen of Water. In a fight she can hold up her own. She didn't ever have a master and learned fighting from experience.

*Jacki:

Jacki is a bit younger than Lia and Fire. One day he met Fire and Lia and joined their group. They trained him and now he is at the same level as Lia.

Lore:

It's a multi-dimensional universe, in this book they are in a medieval time period. This may be different in other volumes since kings are immortal.
